

MOBILE UX / UI SENIOR DESIGNER

Batagelj Jaka

Hi, I'm Jaka Batagelj, also known online as JakacBatko.
I have a lifelong curiosity about how things work.

My path started in high school as a computer technician, continued at the Academy of Multimedia, and evolved into designing apps. I mainly work on mobile applications, but I enjoy tackling a wide range of design problems. I also have basic coding skills, which help me bridge the gap between design and development.

Outside of work, I enjoy drawing pixel art, cooking, camping, flying drones, and experimenting with game development. I'm always eager to explore anything new and interesting that comes my way.

Institute and Academy for Multimedia
